

Client Information Bulletin

10 August 2009

In reference to previous notification dated 7 August 2009, please be advised that following further consideration, Esperance Ports Sea and Land intends to honour its seven-day commitment to vessel berthing notification and has rescheduled critical works on berth two ship-loader.

Effective from midnight on 17 August through until midnight on 31 August 2009 restrictions to berth two will be in place.

These restrictions will take priority over all operations as 31 August is a regulatory directive to meet DEC license requirements for the upgrade works.

However, where possible Esperance Ports will endeavour to minimise any impact to vessel berthing prospects/stevedoring operations.

Should you have any queries regarding this matter contact the Esperance Ports' Business Development Manager Devinder Grewal on 9072 3333.

This information supersedes email information sent last Friday, 7 August, in which a schedule of works indicated that restrictions would be in place immediately in regards to shipping on berth two.
